

## Transporting Your Handibot

- 1 Be sure to switch your Handibot off before unplugging it.

- 2 Unplug your Handibot

- 3 Wrap the power cable around the cable holder.

- 4 Clip the end of the power cable into the little cutout on the back of the tool to hold it in place.

- 5 Drop the 4mm wrench into the hole on the back of your Handibot.

- 6 Drop your collet wrench into the little slot behind the 4mm wrench.

- 7 You're all packed up and ready to go!
